The Istituto di Gestalt series of Gestalt therapy books emerges from the ground of a growing interest in theory, research and clinical practice in the Gestalt community. The members of the Scientific and Editorial Boards have been committed for many years to the process of supporting research and publications in our field: through this series we want to offer our colleagues internationally the richness of the current trends in Gestalt therapy theory and practice, underpinned by research. The goal of this series is to develop the original principles in hermeneutic terms: to articulate a relational perspective, namely a phenomenological, aesthetic, field-oriented approach to psychotherapy. It is also intended to help professions and to support a solid development and dialogue of Gestalt therapy with other psychotherapeutic methods.

The series includes original books specifically created for it, as well as translations of volumes originally published in other languages. We hope that our editorial effort will support the growth of the Gestalt therapy community; a dialogue with other modalities and disciplines; and new developments in research, clinics and other fields where Gestalt therapy theory can be applied (e.g., organizations, education, political and social critique and movements).

We would like to dedicate this Gestalt Therapy Book Series to all our Masters and colleagues who have sown fruitful seeds in our minds and hearts.
